About us

Kids Village was designed by Filtered Events, a local family of creatives working in events. We were approached by a client to keep families at their events longer with a dedicated kids space. Using principles of design, meaning it is fit for purpose, the multi-layered concept of a 'kids village' was born. The Village allows children to dream about their futures creatively through sensory, role based and loose parts play. The Filtered Events team are proud to have established this unique service.

Children are immersed in a magical world, as they explore life differently.
